WEST FOREST DIVISION, MANDIR LANE, NEW DELHI-60

SITE INSPECTION REPORT

The undersigned inspected the plantation sites at Kharkhari Jatmal and Jainpur under South West Range on 22.10.2026 regarding the 1st year maintenance of 2,09,200 plants raised through Miyawaki technique by M/s Agrisense Landscape, under Work Order dated 04.12.2025.

During inspection, the maintenance work was found to be generally satisfactory and in accordance with the terms and conditions of the work order. The agency had deployed sufficient labourers for watering, weeding, hoeing, soil working, cleaning, manure application, pest control and protection of plants.

Regular watering through water tankers was being carried out as per field requirements. Application of vermicompost/manure and anti-termite treatment was also verified during inspection. The plantation area was found reasonably clean and properly maintained.

Physical verification revealed approximately 96% plant survival. However, a few plants were observed to be stressed/dry, and the agency and field staff were directed to ensure immediate corrective measures, regular watering and replacement of casualty plants wherever required.

Overall, the plantation sites were found well maintained, and the 1st year maintenance work of 2,09,200 plants executed by M/s Agrisense Landscape was found SATISFACTORY during inspection.
