SITE INSPECTION REPORT

The undersigned inspected the plantation site at the Pocket-A, B & C under Central Ridge on 14.09.2026 regarding the 3rd year maintenance of 29,600 plantation being executed by M/s Agrisense Landscape.

During the inspection, the following observations were made:

1. The plantation area was found to be well maintained. Routine maintenance activities, including watering, weeding, hoeing, soil working, application of manure, pest control, and protection measures, were being carried out regularly.

2. Watering through tankers and the application of vermicompost/manure were verified during the inspection and found to be satisfactory.

3. A few plants at certain locations were found to be stressed/dry. The executing agency and the concerned field staff were instructed to ensure regular watering, timely replacement of casualties, and proper upkeep wherever required.

4. During the physical verification carried out by the concerned staff, approximately 95% of the plants were found to be healthy and present at the site. The remaining casualty plants were under replacement as per the prescribed maintenance norms.

Overall, the maintenance work of 29,600 plantation at the Pocket-A,B&C under Central Ridge under 3rd year maintenance by M/s Agrisense Landscape was found satisfactory during inspection.
